Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The Sands reference discloses a battery pack housing a plurality of battery cells "30", the battery pack comprising: a housing (not shown) having conductive bus plates respectively connecting positive electrodes and negative electrodes of the plurality of battery cells to outside terminals; wherein the conductive bus plates have structures in which a first member "37" is joined with a second member "33" such that the first member having excellent weldability is arrayed in a plurality of islands state in the second member having excellent conductivity, wherein the positive electrodes and the negative electrodes of the battery cells "30" are welded to the first member "37" of the conductive bus plates (See Figure 3 and page 7, lines 9-24 and page 13, lines 17-18). It also discloses a second member "51" having excellent conductivity that has a structure having an oblong card shape that is larger than the first member "52" in outer shape thereof (See Figure 5). It also discloses a first member joined with a second member that has a combined thickness that is approximately uniform (See Figure 3).

The Kojima reference discloses a terminal connecting plate "1" that has a rectangular slit "5"; wherein the positive electrodes and the negative electrodes are welded to the terminal connecting plate by resistance welding; and wherein the terminal connecting plate is made of nickel (See paragraphs [0016],[0019] and Drawing 3).

The applicant's admitted prior art discloses a terminal board "4-1" that has a projecting portion "15a" on one short side of a plate portion having an oblong card shape (See Figure 1).

However, Sands et al as modified by Kojima and applicant's admitted prior art does not expressly teach the islands of the first member that is formed as a common structure such that adjacent islands are connected by a narrow portion that is narrower than the respective island portions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
